

24-7 Automated protection for vulnerable persons, workers at risk and lone workers. No capital outlay. Easy to use.

PROBLEM:

- You have **mobile workers** that you **need to protect**,
- **or** you have **on site lone workers** who are at **risk**,
- **or** you have **vulnerable relatives living alone**.
- **or** you need to know **their location** and **physical status**.

SOLUTION:

- **LoneALERT** is a solution for all the above problems:-
- **LoneALERT** automatically alerts you **when and where** your lone workers or relatives are in danger.
- **LoneALERT** runs on your **existing mobile phone** and requires **no capital outlay, no additional devices**.
- **LoneALERT** can work with other devices for **GSM** or **GPS** location and **motion sensors** for **man-down**.

Benefits of LoneALERT:

- **No capital outlay** as **LoneALERT** works with your existing phone.
- Compatible with all mobile phones and PDAs so **no need for a second device**.
- Free training ensures you will be **up and running in 15 minutes**.
- Price Guarantee, **we will not be beaten on price**.
- **Free** on-line software **monitoring lone workers** or **vulnerable persons**.
- Cutting edge **Patent protected technology**.

Protection of off site & mobile workers:

- Only requires a **mobile phone**.
- The **lone worker sets a time** for when **LoneALERT** should monitor them at the expected end of their off site visit.
- Keying in their **unique Pin number**, when prompted by the system at the set time, confirms "I'm ok".
- Invalid pin or no response **raises an alarm**.
- **Escalation procedures** in **LoneALERT** automatically **alerts others** of an alarm.
- Separate and additional **Panic** feature used to raise alarm **immediately** from their mobile.

On site workers in danger or at risk:

- Detects when there is a **"man-down"**.
- Only requires a **mobile phone**.
- Automatically **escalates** an alarm if **no movement detected** in a set time.
- **No interaction required** by the worker.
- Intelligent system can be **taught** to detect **unusual activity** as an alarm condition.

If lone worker protection is important to you - remove the risk now:
